

How to Measure Wire

You'll Need:

Measuring Tape Wire Cutting Pliers Pencil Wire

1. Hold the wire on the outside curve
2. Hold the tape on the wire and move your fingers one inch at a time to the measurement you want.
3. When you've measured your length mark the wire with a pencil.
4. Measure again to make sure the length is correct.. Remember "measure twice cut once".
5. If you plan to use a wire joiner cut the wire $\frac{1}{8}$ of an inch shorter.
6. If you plan to over lap and blanket stitch add one inch.
